Ensuring Reliable Water Supply with TECO Motors

Supporting Essential Services in Queensland

Location : Queensland, Australia

Industry : Municipal Water Services

TECO customer in Queensland faced challenges with their existing water booster pump system, which affected the reliability and efficiency of the water supply to thousands of residents and businesses. They needed a robust and reliable solution to support their critical infrastructure.

Solution:

Our TECO team successfully installed a critical municipal drinking water booster pump system, featuring three 250kW 4-pole TECO AFJE series Electric Motors. These motors are designed for industry-leading efficiency and reliability, making them the ideal choice for such an essential service.

Benefits to the Customer:

Robust Performance: The TECO AFJE Electric Motors are renowned for their robust design and superior performance, ensuring a consistent and reliable water supply.

Enhanced Reliability: These motors provide unwavering reliability, crucial for maintaining the water infrastructure.

High Efficiency: The industry-leading efficiency of our motors contributes to reducing operational costs and energy consumption.

Results:

The installation of the TECO AFJE series Electric Motors has significantly improved the performance and reliability of the municipal drinking water booster pump system. This project plays a vital role in safeguarding the water supply for thousands of residents and businesses in the region, ensuring they receive a reliable and consistent service.
