FAQs and Troubleshooting Electric Motor Division

How do I find a datasheet for a particular product in a Motor Series or Range?

You can download our individual datasheets at the bottom of each Series page.

The quickest way to find a particular sheet is to first use the Motor Selector to choose 1 or more of the appropriate kW, Phases, Poles and Voltage. Once the Series results are shown, click on the Series and scroll to the datasheets section. Only datasheets that match your Motor Selector choices will be shown, making it easy to find.
