## Food and Beverage - Abattoir

TECO Electric Motors and Variable Speed Drives: Optimizing Abattoir' Operations.

Contact US

Welcome to TECO's innovative solutions for the Abattoir industry. In the realm of electric motors and variable speed drives, we understand the unique challenges faced by our customers in this dynamic sector. Explore how TECO's technology can revolutionize your operations, addressing critical pain points and fulfilling your specific needs.

Slaughter Line Efficiency Refrigeration and Cold Storage Waste Management and Processing Packaging and Conveyor Systems

Abattoirs strive for streamlined slaughter lines, yet face challenges such as inconsistent speed control, energy inefficiency, and equipment wear. Reliable performance and precision are paramount for optimal productivity. TECO Electric Motors and Variable Speed Drives provide unparalleled speed control, ensuring a seamless and efficient slaughter line. Our technology optimizes energy consumption, reducing operational costs and improving flexibility and control. With enhanced durability, TECO solutions minimise downtime and maintenance, keeping your operations running smoothly. Our latest Machine Health Monitoring units also provide remote or even wireless, real-time monitoring to facilitate genuine asset health-based maintenance.

Maintaining the ideal temperature in refrigeration and cold storage facilities can be a constant struggle. Abattoirs often grapple with energy-intensive systems, temperature fluctuations, and equipment reliability concerns, impacting the quality and safety of stored products.

TECO Variable Speed Drives offer precise control over refrigeration systems, optimizing energy usage and ensuring a consistent temperature environment. Our Electric Motors are designed for reliability, contributing to the longevity of cold storage equipment. Our Open Drip Proof motors have many years of proven reliability and longevity, permitting customers to focus on other issues.

Efficient waste management is a pivotal aspect of Abattoir operations. Challenges include the need for robust waste processing, minimising environmental impact, and adhering to stringent regulatory standards.

TECO Electric Motors power state-of-the-art waste processing equipment, ensuring efficient and environmentally responsible disposal. Our Variable Speed Drives contribute to precise control, reducing energy consumption during waste management processes. TECO offer fuss free IP66 rated high efficiency motors with proven staying power and industry wide acceptance. Offered with Class F or Class H insulation for high temperature areas, these units offer significant service factor and lowest in class harmonic ratings. Our patented greasing system is recommended for hot (operational) motors and with full flush through, you will know when the old grease is fully replaced.

Packaging and conveyor systems play a crucial role in the Abattoir industry, requiring precision, reliability, and adaptability. Challenges include inconsistent conveyor speeds, packaging errors, and the need for quick adjustments to accommodate varying production demands.

TECO Variable Speed Drives enable precise control of conveyor systems, minimising errors and enhancing packaging efficiency. Our Electric Motors offer the reliability needed for continuous operation, adapting seamlessly to changing production requirements. Our IP55 and IP66 motors when used with IP66 rated drives allow much easier cleaning and maintenance for busy packaging lines.
